- For Weighted Average Portfolio Return - the weights are given as per the portfolio composition
- Past performance may or may not be sustained in future and is not a guarantee of any future returns.

How to Read:

Rolling returns: It provides a series of overlapping returns over a specific period, offering a smoother, more comprehensive view of performance compared to discrete period returns. They help investors understand the consistency of returns and risk over various market cycles. (Higher the better).

Drawdown: It refers to how much a fund has fallen from its peak to its trough (Lowest Point) in the selected period. (Lower the better)

Negative Observations: It tells us how many times(%) the scheme has given negative observations in the selected period. (Lower the better)
