

## QUICK TAKE

Markets do remain overvalued across the investment part of the economy and we may see normalisation in some of these segments.

We remain bullish on equities from a medium to long term perspective.

Investors are suggested to have their asset allocation plan based on one's risk appetite and future goals in life.

## KEY HIGHLIGHTS

### MARKETS

Indian equities advanced over the month buoyed by expectations from the budget. Although markets saw a knee jerk reaction on the day of budget, they subsequently recovered and crossed all time highs. The BSE Sensex and the NIFTY 50 ended 3.4% and 3.9% up respectively. Amongst other indices, both the mid-caps and small caps gained during the month. The NIFTY Midcap 100 ended the month higher 5.8% while NIFTY Small Cap 100 ended 4.5% up. The number of stocks trading above their respective 200-day moving averages was higher at 95% in July vs. 88% in June. The advance-decline line was up 3% in July while volatility was down.

Foreign Portfolio Investors (FPIs) bought equities to the tune of US\$3.9 bn while domestic institutional investors remained strong with inflows of US\$2.7 bn. For 2024, FPI net buying stood at US\$4.3bn, while domestic institutions were net buyers at US\$30.7bn. Meanwhile, the mutual fund industry reached a significant milestone as assets under management crossed the Rs60 trn mark.

In its first budget on July 23, 2024, the new coalition government continued on the path of fiscal consolidation, highlighting continuity and consistency in direction of policy making. Large windfall gains from RBI's dividend payout and surge in tax revenues provided the government sufficient room to bring down the deficit from 5.1% to 4.9%. Separately, the capital gains tax, both short term and long term, on equity mutual funds have been increased. There has been no change in the taxation of Debt Mutual Funds – they will be taxed as per the tax slab of the investor. However, funds like gold and silver ETF/index funds, international funds, fund of funds, that were taxed as per investor's tax slab, now post the budget it will be taxed at 12.5% if held for more than 24 months. Overall, the budget specifically focused on employment, skilling, MSMEs, and the middle class. It laid out nine priorities for generating opportunities for all and with the intention that future budgets will also build on these priorities. In addition to the production linked incentives (PLI) the government this time has focused on Employment linked incentives (ELI).

Two of the most awaited events – the elections and budget have finally passed. Markets have witnessed runup as well as volatility based on these events and all indices touched lifetime highs. With slowing global growth particularly in the US and markets being overvalued across the investment part of the economy, we may see normalisation in some of these segments.

After 3 years of above 20% earnings growth, a slowdown is visible this quarter and growth is likely to be less than 15% this year. In addition, equity supply has also picked up with stake sales by promoters, PE and large pipeline of IPOs. These could be the likely triggers going forward in addition to the outcome of US presidential elections and global geopolitics. Having said that, any declines are likely opportunities to increase exposure to equities. One must remember that markets never move in a straight line but in cycles and it would be prudent to stay invested at all times based on investor goals, investment horizon and risk profile with a long-term view. India remains one of the fastest growing economies globally. Macros remain strong with an easing inflation cycle, progress of monsoons and robust economic growth.

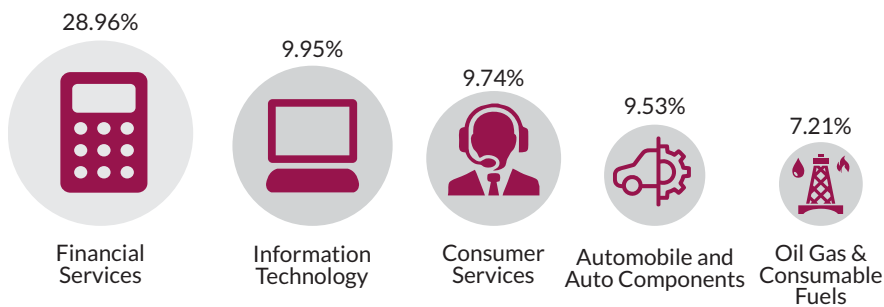

The government initiatives aimed at boosting employment is expected to aid consumption. Gradual signs are visible in the form of improving FMCG sales in rural areas, two wheeler sales and improving kharif crop sowing levels. We expect consumption growth to be broad based and an above normal monsoon coupled with the festive season to support this consumption. The trend of premiumisation continues, benefiting various segments within consumer discretionary. Automobiles, real estate, and high-end retail have all experienced growth. The housing sector is witnessing increased absorption across India, and with the government's emphasis on affordable housing, building materials and related industries are poised to benefit. We maintain our overweight stance in these sectors.

Even though there is no change in the capex expenditure compared to the interim budget, it is a 17% growth on YOY terms, which in itself is a healthy figure. The fiscal discipline by the government will translate to crowding in for private investments. With the government also emphasizing on private capex, the entire curve of the capex cycle stands to benefit in light of multiple enablers such as deleveraged corporate balance sheets, healthy profitability, rising domestic demand, and increasing capacity utilization. Accordingly, we are overweight on the infrastructure, manufacturing, utilities and transport. We maintain a bias to holdings in sectors that can benefit from government policies such as energy, defense, power. We have an underweight in the export-oriented segment, attributing this to global economic slowdown.

## AXIS BLUECHIP FUND

- The fund focuses on delivering superior risk adjusted returns. The fund aims to outperform the benchmark while delivering risk that is lower than the benchmark.
- Stocks are selected in the portfolio based on their ability to grow earnings on a sustainable basis from a medium term perspective while maintaining a highly liquid and risk managed portfolio.
- The strategy is to invest mainly in companies which operate in a secular growth segment and have leading market share in their areas of operation to provide steady returns and the remaining in companies that are gaining market share due to differentiated offerings or cost advantage.

### Top 5 Sectors (as on 31st July 2024)

Current Portfolio Allocation is based on the prevailing market conditions and is subject to changes depending on the fund manager's view of the equity markets.

## AXIS ELSS TAX SAVER FUND

- The fund is focused on quality companies having strong long term earnings growth prospects. Thus the fund maintains a stable core portfolio with relatively low churn. Within that objective, the fund is comfortable looking past shorter term volatility in performance.
- With a medium to long term view towards capturing growth, the fund is biased towards stocks which can deliver superior returns.
- The fund looks at opportunities across the market cap and the portfolio remains balanced between its large and mid-cap allocations. It invests in quality businesses for the long term through bottom up stock picking.

### Top 5 Sectors (as on 31st July 2024)

## AXIS INNOVATION FUND<sup>^^</sup>

(Erstwhile Axis Special Situations Fund)

- Innovative trends have been driving change across all major industries creating potential investment opportunities both in India and abroad. A combination of government push, global investments, domestic ingenuity and focus on low cost, wide adoption models have already seen us coming up unique transformative solutions in India.
- The fund endeavours to target Innovative growth opportunities across the entire value chain both in India & abroad. Through a multi cap approach the fund will focus on identifying current innovative themes, then narrow it down to specific sectors. The endeavours to invest from a long term prospective, as some companies may not be profitable but hold significant potential in the long run.

<sup>^^</sup>Effective June 13, 2024, the fundamental attribute of the Fund has been revised.

Reliance Industries Limited	2.32

## AXIS VALUE FUND

- The fund offers a differentiated strategy that improves on traditional value investing to avoid its pitfalls. We believe that the singular focus on valuations that typical value strategies adopt is misguided since valuation has to be seen in context with the health and future potential of the business. Many low valuation businesses may be in essence value traps – i.e. destined to remain cheap forever given their poor fundamentals.
- As a result, we believe that the portfolio needs to use a more evolved process. The approach that fund intends to use is to look for companies that combine strong fundamentals with reasonable valuations which we believe have the potential to generate long term wealth generation as the prospects of these businesses get unlocked or as the economy/ sector goes through its growth phase. Fund also do stocks selection based on the turnaround in ROE/cash flows or earnings, management turnaround and sector dynamics shifts.
- From a medium to long term prospective, the fund focuses on creating wealth through multiples re-rating and playing cycles.

### Top 5 Sectors (as on 31st July 2024)

## AXIS QUANT FUND

- An explosion in data has resulted in a change in the investment paradigm. Fund managers today increasingly rely on large scale data collation and inferring high quality actionable insights can often become challenging. A structured use of quantitative techniques can aid your investment journey.
- The Axis Quant Fund aims to leverage Axis AMC's fundamental research base and strategically use quantitative data to offer a fundamentally driven alpha strategy with an endeavour to generate consistent alpha for long-term investors. The offering blends a traditional research-based approach with rules-based criteria to identify stocks and sectors within a well-established quality framework.

### Top 5 Sectors (as on 31st July 2024)

Current Portfolio Allocation is based on the prevailing market conditions and is subject to changes depending on the fund manager's view of the equity markets.

## AXIS MULTICAP FUND

- Indian capital markets offer a multitude of investment opportunities across the market cap spectrum. The fund offers a diversified portfolio of equities within a predefined construct of large caps, mid caps and small caps. To ensure diversification of investment across market caps, the scheme will invest a minimum of 25% each in Large, Mid and Small Cap stocks, with the balance 25% flexibility to the fund manager.
- The fund aspires to capture potential opportunities throughout the lifecycle of the company's progression from smallcap all the way to a largecap. Through this approach the fund aims to achieve a quality centric long term portfolio with an improved risk reward profile and controlling fund volatility typically faced during fund rebalancing.

## AXIS BUSINESS CYCLES FUND

- The business cycle is a critical determinant of equity sector performance over the intermediate term and the relative performance of equity market sectors typically tends to rotate as the overall economy shifts from one stage of the business cycle to the next, with different sectors assuming performance leadership in different economic phases. It must be noted however, that individual sectors do not follow the same performance pattern every period. Also, business cycle transitions are gradual and may have many overlapping periods.
- The Axis Business Cycles Fund aims to identify economic trends and invest in the sectors and stocks that are likely to outperform at a given stage of the business cycle. The fund manager will consider various macroeconomic parameters (like GDP Growth, exports, interest rates, inflation etc.), high frequency indicators (like private consumption indicators, PMI, etc.), business and consumer sentiment indicators (corporate earnings, business confidence index, forward-looking estimates, etc.) to decide on the state of the business cycle.

### Top 5 Sectors (as on 31st July 2024)

## AXIS INDIA MANUFACTURING FUND

- Axis India Manufacturing Fund India is undergoing a strong structural change on the back of various initiatives. Make in India: to turn India into a centre for manufacturing, design, and innovation, PLI schemes: Various schemes for 14 sectors to enhance manufacturing capabilities and exports and aatmanirbhar Bharat: Encourage import substitution. These are expected to benefit the manufacturing segment.
- Axis India Manufacturing Fund is a multi-cap strategy with an active sectoral approach. The Fund endeavour to identify companies across 3 segments of the Indian economy – Investment, Consumption and Net Exports.
