

WEALTH

Fundz Performance this Quarter Watch

July 2025 - September 2025

Dear Valued Reader,

We are witnessing challenging times with multiple conflicts unfolding across the globe. Despite these challenges, the global financial system has shown impressive resilience in managing these shocks. Global economic activity has, by and large, held up against potential risks, and fears of a severe downturn seem to be diminishing.

The Global Outlook

As we move through the second half of the year, global growth remains steady but slower than historical norms, with significant regional variations. While some emerging market economies have adapted well and demonstrated resilience, others, particularly lower-income nations, remain in a sensitive position. Additionally, a few advanced economies are at risk of experiencing an economic slowdown.

The outlook for the world economy in 2024 and 2025 suggests steady but modest growth. The global economy is projected to expand at a rate of 3.2% in both 2024 and 2025, maintaining the pace set in 2023. Growth in advanced economies is expected to pick up slightly, while growth in emerging markets and developing economies may slow down. Global inflation is forecasted to gradually decline, from 6.8% in 2023 to 5.9% in 2024 and 4.5% in 2025. Despite significant interest rate hikes by central banks, the global economy has proven to be resilient. However, it remains important to strengthen global cooperation and address ongoing debt challenges.

The Outlook for India:

India continues to stand out as a key driver of economic growth on the global stage, showing strength in the face of inflationary pressures and geopolitical uncertainty. After experiencing a sharp contraction due to the COVID-19 pandemic, India has bounced back with real GDP growth averaging over 8% between 2021 and 2024. Looking ahead, the RBI has projected real GDP growth at 7.2% for 2024-25, reflecting the solid foundation of India's macroeconomic fundamentals.

This growth is driven by strong domestic consumption and private investment, supported by an environment of macroeconomic and financial stability. Inflation remains moderate and within the RBI's tolerance range of +/- 2% around its 4% target. Additionally, fiscal consolidation is progressing, with public debt levels on a downward trajectory. Corporate performance has significantly improved, leading to deleveraging and robust growth in profitability, which has also contributed to the rally in equity markets.

With structural reforms, a focus on boosting domestic consumption, and stable macroeconomic indicators, India continues to be an attractive destination for both foreign and domestic investors. The re-election of the NDA government for a third consecutive term has further solidified confidence in the continuity of reforms and the economy's development agenda.

Looking Ahead:

Looking ahead, global and Indian economies face both risks and opportunities. Global challenges like inflation, interest rate hikes, and geopolitical tensions could affect growth and markets. The elections in the US are a key event to look out for. In India, despite strong growth prospects, risks such as fluctuating inflation and potential market corrections remain, largely due to global tensions and supply chain disruptions. Investors should maintain a long-term view, investing in growth assets, and leverage any market corrections during these volatile markets.

As always, we remain committed to providing you with the information and insights you need to make informed financial decisions. All figures are as of 30th June, 2025

HIGHLIGHTS

- NIFTY 50 & BSE SENSEX gained 1997.7 and 6191.54 points respectively in the first Quarter of FY 25-26. The BSE indices like SME IPO (+27.23%), Telecom (+19.45%), and Diversified Financials Revenue Growth Index (+17.59%) were major gainers.
- The Indian equity market in the first quarter of FY26 presents a nuanced picture, shaped by a mix of encouraging domestic tailwinds and persistent global uncertainties. After a prolonged correction spanning five months (Oct '24–Feb '25), the Nifty 50 has rebounded over 17% from its April lows, marking four consecutive months of gains since March. This recovery has been fueled by a combination of supportive policy actions, improved macroeconomic stability, and rising investor optimism.
- A 50 bps cut in June, coupled with ample liquidity support, signaled a strong pro-growth stance, boosting market sentiment. Lower inflation further reinforced confidence in the economic outlook. A 90-day pause in U.S. tariffs (excluding China) by President Trump helped ease fears of a wider trade conflict and supported a global risk-on sentiment.
- Foreign Portfolio Investors (FPIs) showed a significant return to the Indian equity market in May 2025, marking their strongest monthly inflow this calendar year. They injected a substantial ₹19,860 crore into Indian stocks during May, making it the second consecutive month of net FPI inflows, following April's ₹4,223 crore investment. However, despite this recent positive shift, FPIs remain net sellers overall for 2025, with total outflows year-to-date reaching ₹92,491 crore as of May 30.
- On the micro front, Q4 corporate earnings exceeded expectations, and optimistic management commentaries have further lifted investor confidence. Retail participation continues to rise, supported by steady domestic institutional inflows, making the market rally broad-based and structurally sound.
- Some of the key events to watch in the upcoming quarter are:
 - Q1 FY26 earnings announcements: Corporate earnings for the April–June 2025 period will offer the first clear snapshot of business performance in the new fiscal year.
 - Management commentary: Beyond the numbers, management commentary will be crucial in setting market expectations for H2 FY26.
 - U.S. Tariff Pause Expiry: Announcements following the end of the 90-day pause on tariff actions by the Trump government, due on August 1.
 - RBI's Next Policy Decision: Following the surprise 50 bps rate cut in June, the RBI's August policy review will be critical.

Debt Market

FIXED INCOME

- The Indian debt market in Q1 FY26 (April-June 2025) experienced a dynamic interplay of domestic policy actions, evolving inflation trends, and persistent global headwinds.
- In a move that surprised markets, the RBI implemented a deeper-than-expected 50 basis point (bps) cut to the policy rate, alongside a 100 bps reduction in the Cash Reserve Ratio (CRR), effective later in the year. Despite these significantly dovish measures, the Monetary Policy Committee (MPC) concurrently shifted its stance back to 'neutral', signaling that the room for further aggressive monetary support might be limited.
- Inflation continued its downward trajectory during Q1 FY26. Headline Consumer Price Index (CPI) eased to 2.8% year-on-year (YoY) in May 2025, a decrease from 3.2% in April 2025, reaching its lowest point since March 2019. While the RBI maintained its FY26 GDP growth forecast at 6.5%, it revised its inflation projection downwards from 4% to 3.7%.
- Despite the initial dovish policy moves, Indian bond yields saw a sharp rise in June 2025. This was primarily attributed to two factors: the RBI's shift to a 'Neutral' stance, which markets interpreted as a potential end to the rate-cutting cycle, and escalating tensions in the Middle East, which pushed crude oil prices higher. Consequently, India's 10-year G-sec yield edged up 4 bps to 6.32%, and the India-U.S. yield spread narrowed to below 200 bps, significantly lower than its 20-year average of over 450 bps.
- Foreign investors have subsequently pulled out approximately ₹2,766 crore net from Indian bonds that are part of global bond indices since the 50 bps rate cut on June 6th.

Forex

FOREX

- The Rupee demonstrated a minor appreciation during the quarter. It closed around **85.58 per US dollar at the end of March 2025** and strengthened slightly to approximately **85.54 per US dollar by the end of June 2025**, showcasing its underlying stability amidst fluctuating global conditions. The RBI's policy actions and an uptick in Foreign Direct Investment (FDI) inflows further bolstered investor confidence. While global trade dynamics remained a factor, India's robust domestic demand and consistent economic reforms helped to mitigate external pressures. The Rupee's performance reflected a growing stability, positioning it favorably for the quarters ahead.

DISCLAIMER: NJ India Invest Private Limited (NJ) is a mutual fund distributor. Certain products and services offered by NJ may not be traded on the exchange. Disputes with respect to the distribution activity, would not have access to Exchange Investor Redressal Forum or Arbitration mechanism. The information contained herein does not constitute, and should not be construed as, investment advice or a recommendation to buy, sell, or otherwise transact in any security or investment product or an invitation, offer or solicitation to engage in any investment activity. It is strongly recommended that you seek professional investment advice before taking any investment decision. Any investment decision that you take should be based on an assessment of your risks in consultation with your investment adviser. To the extent that any information is regarding the past performance of securities or investment products, please note such information is not a reliable indicator of future performance and should not be relied upon as a basis for an investment decision. Past performance does not guarantee future performance and the value of investments and the income from them can fall as well as rise. No investment strategy is without risk and markets influence investment performance. Investment markets and conditions can change rapidly, and investors may not get back the amount originally invested and may lose all of their investment.

Mutual fund investments are subject to market risks, read all scheme related documents carefully before investing.
